

T R Zuhaib Mohammed (zuhaibmd.eth)

Smart Contract Auditor | Developer | Open-Source Contributor | Blogger

I am a passionate Blockchain Enthusiast dedicated to contributing to the web3 ecosystem as a Smart Contract Auditor. Committed to upholding the integrity and security of the blockchain space. My goal is to leverage my diverse skill set to identify and rectify vulnerabilities in smart contracts, ensuring the advancement and safety of the web3 and broader blockchain community.

WORK EXPERIENCE

Blockchain Security Researcher Freelancer

04/2022 - Present

Achievements

- Working as Smart Contract Developer/Auditor at firms like **Secure3**, **AuditOne** and audited over **40+ codebases**
- I was part of **yAcademy's** ZK Fellowship learning to audit codebases in **Rust/Halo2**
- Completed Smart Contract Security Fellowship at **Macro Security**.
- Concluded the **Encode Club Expert Solidity Bootcamp**
- I was part of the **QuillAudits** "Audit With Us" program.
- Contributor to **SunWeb3Sec/DeFiHackLabs** and **DeFiVulnLabs** GitHub repository.
- Document my learnings about web3 via my **Medium** blog with almost **1k reads** per month and **350+ followers**.

Security Signature Engineer Qualys Security TechServices Private Limited

08/2021 - 04/2023

Pune

Responsibilities

- Research on latest vulnerabilities, understand the **Proof of Concept (PoC)** and **Exploit** it in the lab environment and write a detection for it.
- Write **Vulnerability Signatures** across range of products like VMWARE, JIRA, ADOBE, MICROSOFT etc.,
- Interacting with Customers like **Apple**, **Amazon** to resolve their queries and provide support.

Software Engineer (Backend) Honeywell Technology Solutions

01/2017 - 06/2021

Bangalore

Responsibilities

- I was responsible to implement a python automation that helped **save almost 10 hours of manual effort**, the script extracts data regarding the DLP Agents on a network.
- Implement feature requirement by via the **backend** and **frontend** code along with unit test cases.
- Develop **REST APIs** and test **CRUD** operations using Postman for Authorization checks.
- Test the web application for **OWASP Top 10** vulnerabilities list like SQLi, CSRF, XSS, IDOR and provide a fix.

TECHNICAL SKILLS
